# {xaringanBuilder}

# Build xaringan slides to different outputs

John Paul Helveston

2020/09/27 (updated: 2021-02-26)

## Installation

You can install the current version of xaringanBuilder from GitHub:

```
# install.packages("remotes")
remotes::install_github("jhelvy/xaringanBuilder")
```

### Installation

You can install the current version of xaringanBuilder from GitHub:

```
# install.packages("remotes")
remotes::install_github("jhelvy/xaringanBuilder")
```

#### **Supported output types:**

- html
- pdf
- gif
- mp4
- pptx
- png
- social: png image of first slide sized for social media sharing (e.g. Twitter)

### Installation

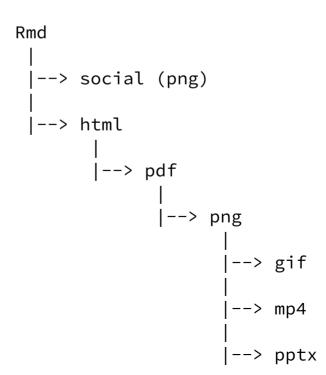

You can install the current version of xaringanBuilder from GitHub:

```
# install.packages("remotes")
remotes::install_github("jhelvy/xaringanBuilder")
```

#### **Supported output types:**

- html
- pdf
- gif
- mp4
- pptx
- png
- social: png image of first slide sized for social media sharing (e.g. Twitter)

#### **Build hierarchy:**

### Partial / incremental slides

For pdf, png, gif, mp4, and pptx output types, if you want to build a new slide for each increment on incremental slides, set partial\_slides = TRUE in any of the following build functions:

```
build_pdf()
build_png()
build_gif()
build_mp4()
build_pptx()
build_all()
```

### Partial / incremental slides

For pdf, png, gif, mp4, and pptx output types, if you want to build a new slide for each increment on incremental slides, set partial\_slides = TRUE in any of the following build functions:

```
build_pdf()
build_png()
build_gif()
build_mp4()
build_pptx()
build_all()
```

For example, the following code would render this slide as two slides in a pdf instead of one:

```
build_pdf("slides.Rmd", partial_slides = TRUE)
build_pdf("slides.html", partial_slides = TRUE)
```

**Note**: This option requires the chromote and pdftools packages.

# Complex slides

"Complex" slides are slides that contain panelsets (like the one on this slide) or other html widgets / advanced features that might not render well as a pdf. To render these on separate slides, set complex\_slides = TRUE in build\_pdf(), build\_png(), build\_gif(), build\_mp4(), build\_pptx(), or build\_all().

Chunk Output

head(mtcars)

# **Complex slides**

"Complex" slides are slides that contain panelsets (like the one on this slide) or other html widgets / advanced features that might not render well as a pdf. To render these on separate slides, set complex\_slides = TRUE in build\_pdf(), build\_png(), build\_gif(), build\_mp4(), build\_pptx(), or build\_all().
